Improving regional trade efficiency
Investment in Inland Container Depot (ICD):
Case Study – PIA's ICD to Decongestion Port of Lomé
Annual handling capacity to cater for 550,000 TEUs (by 2030)
Efficient stuffing and destuffing operations by mechanical means
Concrete platform to ensure complete safety and no damage to containers parked inside the container yard
Easy access to main highway N1 connecting to hinterland regions of Togo and landlocked countries of sub-Saharan Africa
Quick and efficient operations to ensure savings on demurrage and delay costs
Presence of government authorities in single window center to ensure completion of formalities and smooth flow of goods
PIA
1 All containers from Port of Lomé going to hinterland countries (e.g. Burkina Faso) have to be cleared by PIA's ICD.
2 Products transformed at the industrial zone and geared towards exports via the port of Lomé are organized and cleared at PIA's ICD
