New Port Project, Qatar

As part of the New Port Project, Royal HaskoningDHV has been selected to provide engineering and design services for the construction of a new port facility in Qatar. The project involves the construction of a new quay wall and the expansion of the port's capacity. The new port facility will provide a significant boost to Qatar's economy and will be a major landmark for the country.

East Haila - Housing Reclamation

Royal HaskoningDHV has been selected to provide engineering and design services for the construction of a new housing reclamation project in East Haila. The project involves the construction of a new housing development and the reclamation of land. The new housing development will provide a significant boost to the local economy and will be a major landmark for the area.

Khalifa Bin Salman Port (KBSP)

Royal HaskoningDHV has been selected to provide engineering and design services for the construction of the Khalifa Bin Salman Port (KBSP). The project involves the construction of a new port facility and the expansion of the port's capacity. The new port facility will provide a significant boost to the local economy and will be a major landmark for the area.

Asry Basin Quay Wall

Royal HaskoningDHV has been selected to provide engineering and design services for the construction of a new quay wall for the Asry Basin. The project involves the construction of a new quay wall and the expansion of the basin's capacity. The new quay wall will provide a significant boost to the local economy and will be a major landmark for the area.

BASREC Facilities Expansion

Royal HaskoningDHV has been selected to provide engineering and design services for the construction of a new facilities expansion for the BASREC. The project involves the construction of a new facilities expansion and the expansion of the BASREC's capacity. The new facilities expansion will provide a significant boost to the local economy and will be a major landmark for the area.
