Philippine Ports and Logistics 2024 Continues to be the Biggest Biennial Ports and Logistics Exhibition and Conference in the BIMP-EAGA Region

Follow us on:

Republic of the Philippines
DEPARTMENT OF TRANSPORTATION

28 June 2023

Dear Valued Participants,

Greetings!

The Philippines is well-poised as a strategic location for ports and logistics in Southeast Asia given its geographic position and vast coastline. This has been enhanced over the years by significant investments in transport infrastructure covering airports, seaports, railways and highways.

In terms of logistics, the country has a large and competent work force proficient in English making it an attractive destination for outsourcing services for logistics support. The industry is highly competitive, with several players offering a wide range of logistics services, from freight forwarding to customs clearance and supply chain management.

The Philippine government, through the Department of Transportation, recognizes the importance of an efficient and effective supply chain and continues to exert its best effort to improve transportation in the country, as this will redound to a lower transport cost for end users. The Department of Transportation also supports current initiatives being undertaken in the areas of digitalisation and decarbonization.

The government strategies and private sector initiatives for supply chain and logistics will be highlighted in the next **Philippine Ports and Logistics 2024 Exhibition and Conference** to be held in Manila from **19 to 21 March 2024**.

All maritime transport and logistics stakeholders, practitioners and investors are strongly encouraged to participate in this exhibition and conference.

Your active participation and support will make the 2024 gathering a success.

Mabuhay!

Sincerely,

JAIME J. BAUTISTA
Secretary
