TARANTO SCCT PROJECT CARGO GATEWAY

LOGISTICS PLUS BELGIUM BV

Logistics Plus® is a leading worldwide provider of Project Cargo & Break Bulk services. We manage your project from start until finish, and everything in between. Heavy-lift, oversized, over-dimensional; we do it all!

The background image shows a large red and white cargo ship docked at a port. Two workers in yellow safety vests and white hard hats stand on a wooden pier in the foreground, looking towards the ship. A large white cylindrical object is being moved by a crane on the ship. The scene is reflected in the calm water in the foreground.

1 ABOUT LOGISTICS PLUS

2 CASE STUDY

3 PROSPECTS

COMPANY **TIMELINE** (EARLY YEARS)

1996

Today

UPWARD & ONWARD!

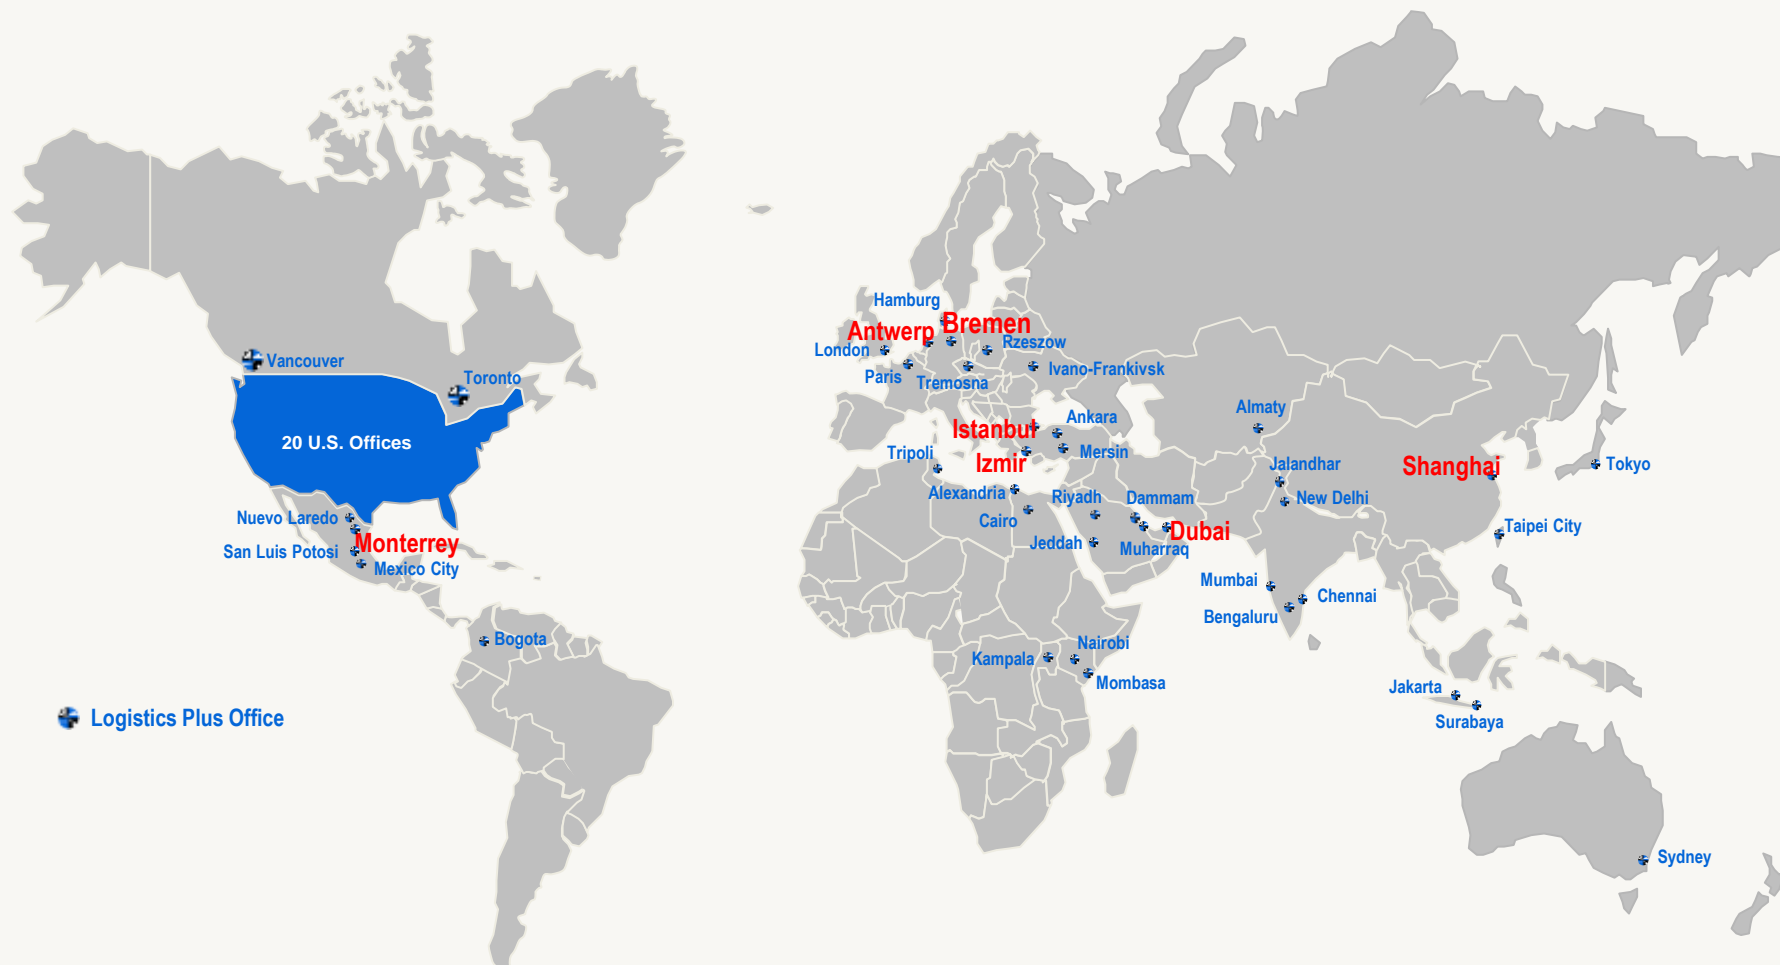

Logistics Plus continues record-growth with established and 21st century companies such as GE, Google, and many others.

OUR GLOBAL NETWORK

 We have 450+ employees at 50+ locations in 20+ countries worldwide

PROJECT LOGISTICS SOLUTIONS

PROJECT CARGO

We handle cargo and freight that the “other guys” can’t or won’t. Whether it’s heavy-lift or over-dimensional, we will manage your projects from start to finish. Our team starts by customizing a logistics plan for your unique project needs.

FREIGHT FORWARDING

We are a full-service international air and ocean freight forwarder. We have long-standing relationships with industry leading, reliable carriers which allow us to obtain competitive rates for our customers.

WORLD-CLASS TECHNOLOGY

Logistics Plus world-class technology is built on industry-standard platforms with customized portals and unique functionality designed to provide our clients with valuable tools, information and dashboards.

CASE STUDY WIND TURBINES

CHALLENGE

Our VIP customer Emergya Wind Technology needs to build several hundred wind turbines in south Italy. The generators measure 5,7 x 5,7 x 2,85 meter and weigh 30 tons.

FIRST TRIALS

Initially the customer set up a bonded warehouse in Manfredonia. For large charters of towers and blades we manage to go there, but it is a challenge. Generators were initially routed by RORO via Livorno, but the road transport was expensive and complicated.

SOLUTION

With our long term partners CMA CGM and with great support of Yilport Taranto SCCT these generators now move from Shanghai to Malta and then to Taranto where SCCT are even providing value added services. Net result: faster and more reliable deliveries.

CASE STUDY: WIND TURBINES

PROJECT CARGO : PROSPECTS

WIND POWER: FULL CHARTERS

- 🌐 Bonded storage capacity
- 🌐 Port cranes
- 🌐 Great location

MACHINERY: E.G. STEEL PLANTS
