

---

# Does Digitalization really work?

- What can container shipping learn from other industries that have already undergone digital transformation?
- Can maritime transport make the necessary shift to embrace digitization and achieve the same kind of benefits?

# Digital Freight Alliance

Making sense for your business

## Digital Connectivity

Connecting freight forwarders around the world and providing the best online web-based tools to enhance the growth of your business.

## Wide coverage

The Alliance is an independent freight forwarders' association covering more than 190 countries.

## Technologies

Ecosystem of applications, featuring ships schedules, track & trace, online quotations, paperwork automation, smart booking management and more.

Members

*Approach your customers  
with more certainty.*

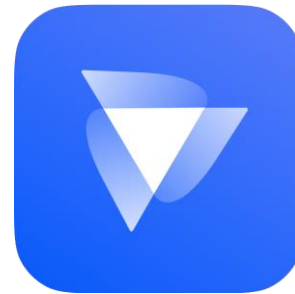

# The Future is Now

## Shipments Tracking

An ultimate cargo tracking system, which works on any desktop or mobile device to let your customers know where their cargo is and view it on the map in just a few clicks without calling you!

02

## Logistics Explorer

A unique online-quotation module for transport and logistics companies who want to increase their sales using own site to get online bookings from customers. It's designed to make your business experience even faster, more responsive, and more efficient

01

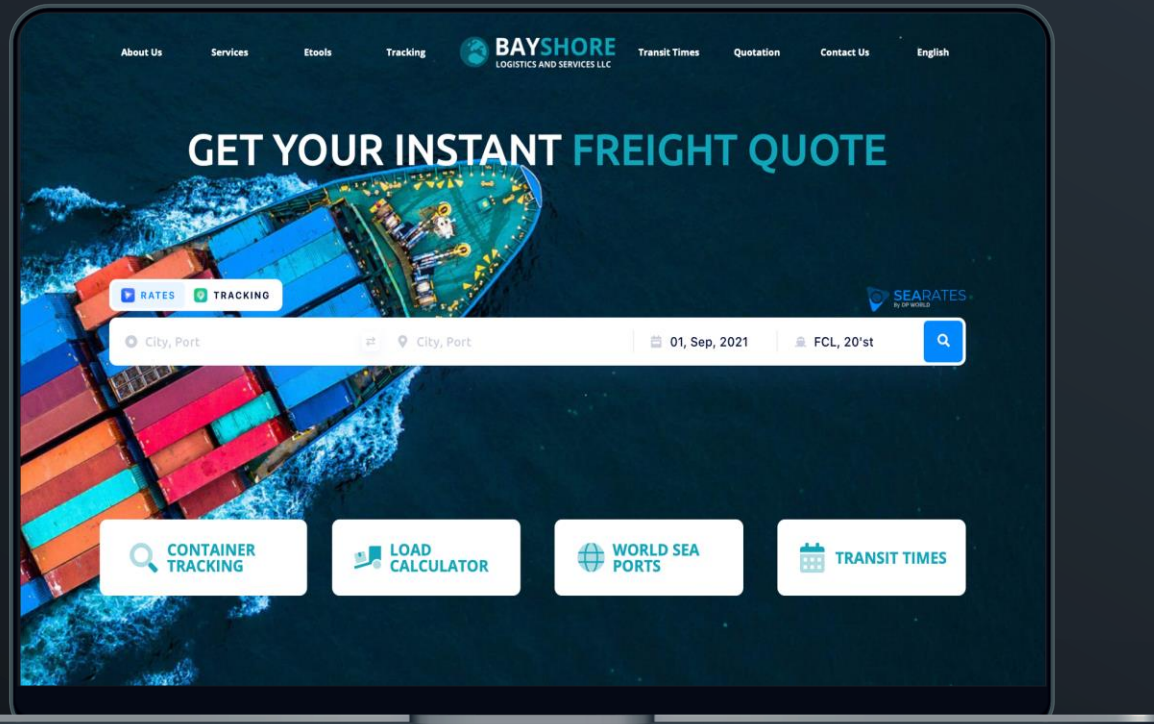

## Ships Schedules

An ultimate system, powering your business with actual sailing dates within major ocean carriers for container shipping and beyond. The system allows you to search by routing, port, vessel.

03

# Logistics Explorer Integration

Sea
