Development Strategy

3. Kalibaru

efficiency, attracting
ensuring Indonesia's import - export

The development of container terminal 2 and 3 (CT2 and CT3) each designed with a capacity of 15 million TEUS is being carried out in collaboration with strategic partners.

The development combined capacity growth of energy sector.

Construction of 6.6 km connecting road between terminal is a must-have infrastructure for connectivity between port and land.

The integration of JTCC enhance cost efficiency, balanced traffic distribution network.
