Ambition to integrate existing (and new) facilities into HHLA's growing hinterland network

Integration of maritime and hinterland networks for efficient supply chains

● HHLA Marine Terminals

- Focus on development of interlinked regional hubs to efficiently serve the (European) hinterland
- Strong focus on railway connections, e.g.
 - Support of Amber train in Baltics States
 - Support to re-establish Tallinn as gateway for Russia
 - Efforts to position TK as part of OBOR initiative
 - Establishment of UIC to improve intermodal offering in Ukraine
 - Set-up of intermodal connections in Trieste and integration into Metrans network
- Development of non-container activities and value added services, to diversify and bind customers
 - Support in attraction of customers for value added services at TK and CTO
 - Support across subsidiary activities, e.g. Projects and terminals

A man with glasses and a beard, wearing a dark suit and a striped tie, stands behind a white podium. He is holding a small object in his right hand and has his left hand on the podium. The podium features the Maritim logo, which consists of three blue triangles above the word "MARITIM" in blue capital letters. Below "MARITIM" are the words "SEEHOTEL" and "TIMMENDORFER STRAND" in smaller blue capital letters. A microphone is positioned in front of the podium. The background is a wall with large wooden panels.
