YILPORT Iberia Logistics

Build inland connectivity to secure container flows to Iberian Terminals

Expansion of Intermodal Capabilities: Accelerating intermodal development to enhance connectivity, expand the hinterland influence, and optimize supply chain efficiency for customers.

Leverage enhanced depot capabilities as a strategic advantage over competing ports such as Sines and Vigo, while simultaneously generating additional revenue streams.

DIGITAL TWIN

Faster Port

Optimized operations delivering unprecedented speed and throughput

Safer Operations

Proactive security and risk management protecting people and assets

Smarter Decisions

AI-powered insights driving intelligent operational choices

Lower Costs

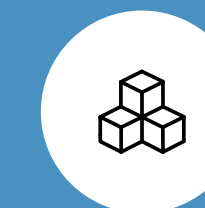

Reduced fuel consumption, equipment wear, and operational expenses

How Digital Twin Technology Works

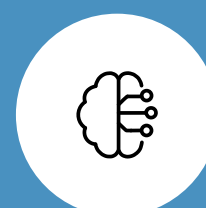

Data Layer

Real-time integration from TOS, AIS vessel tracking, IoT sensors, and OCR systems creating a comprehensive data foundation

3D Modeling

Advanced port simulations with precise digital representations of every crane, container, and vessel movement

AI Decision Support

Machine learning algorithms analyze patterns and optimize operations with predictive intelligence

TOS Integration Excellence

Real-Time Synchronization

- ❖ Live RTG and STS crane telemetry matching
- ❖ Automated yard position updates
- ❖ Container status synchronization

Predictive Analytics

- ❖ Equipment collision prevention
- ❖ Traffic flow optimization
- ❖ Resource allocation forecasting

End-to-End Visibility

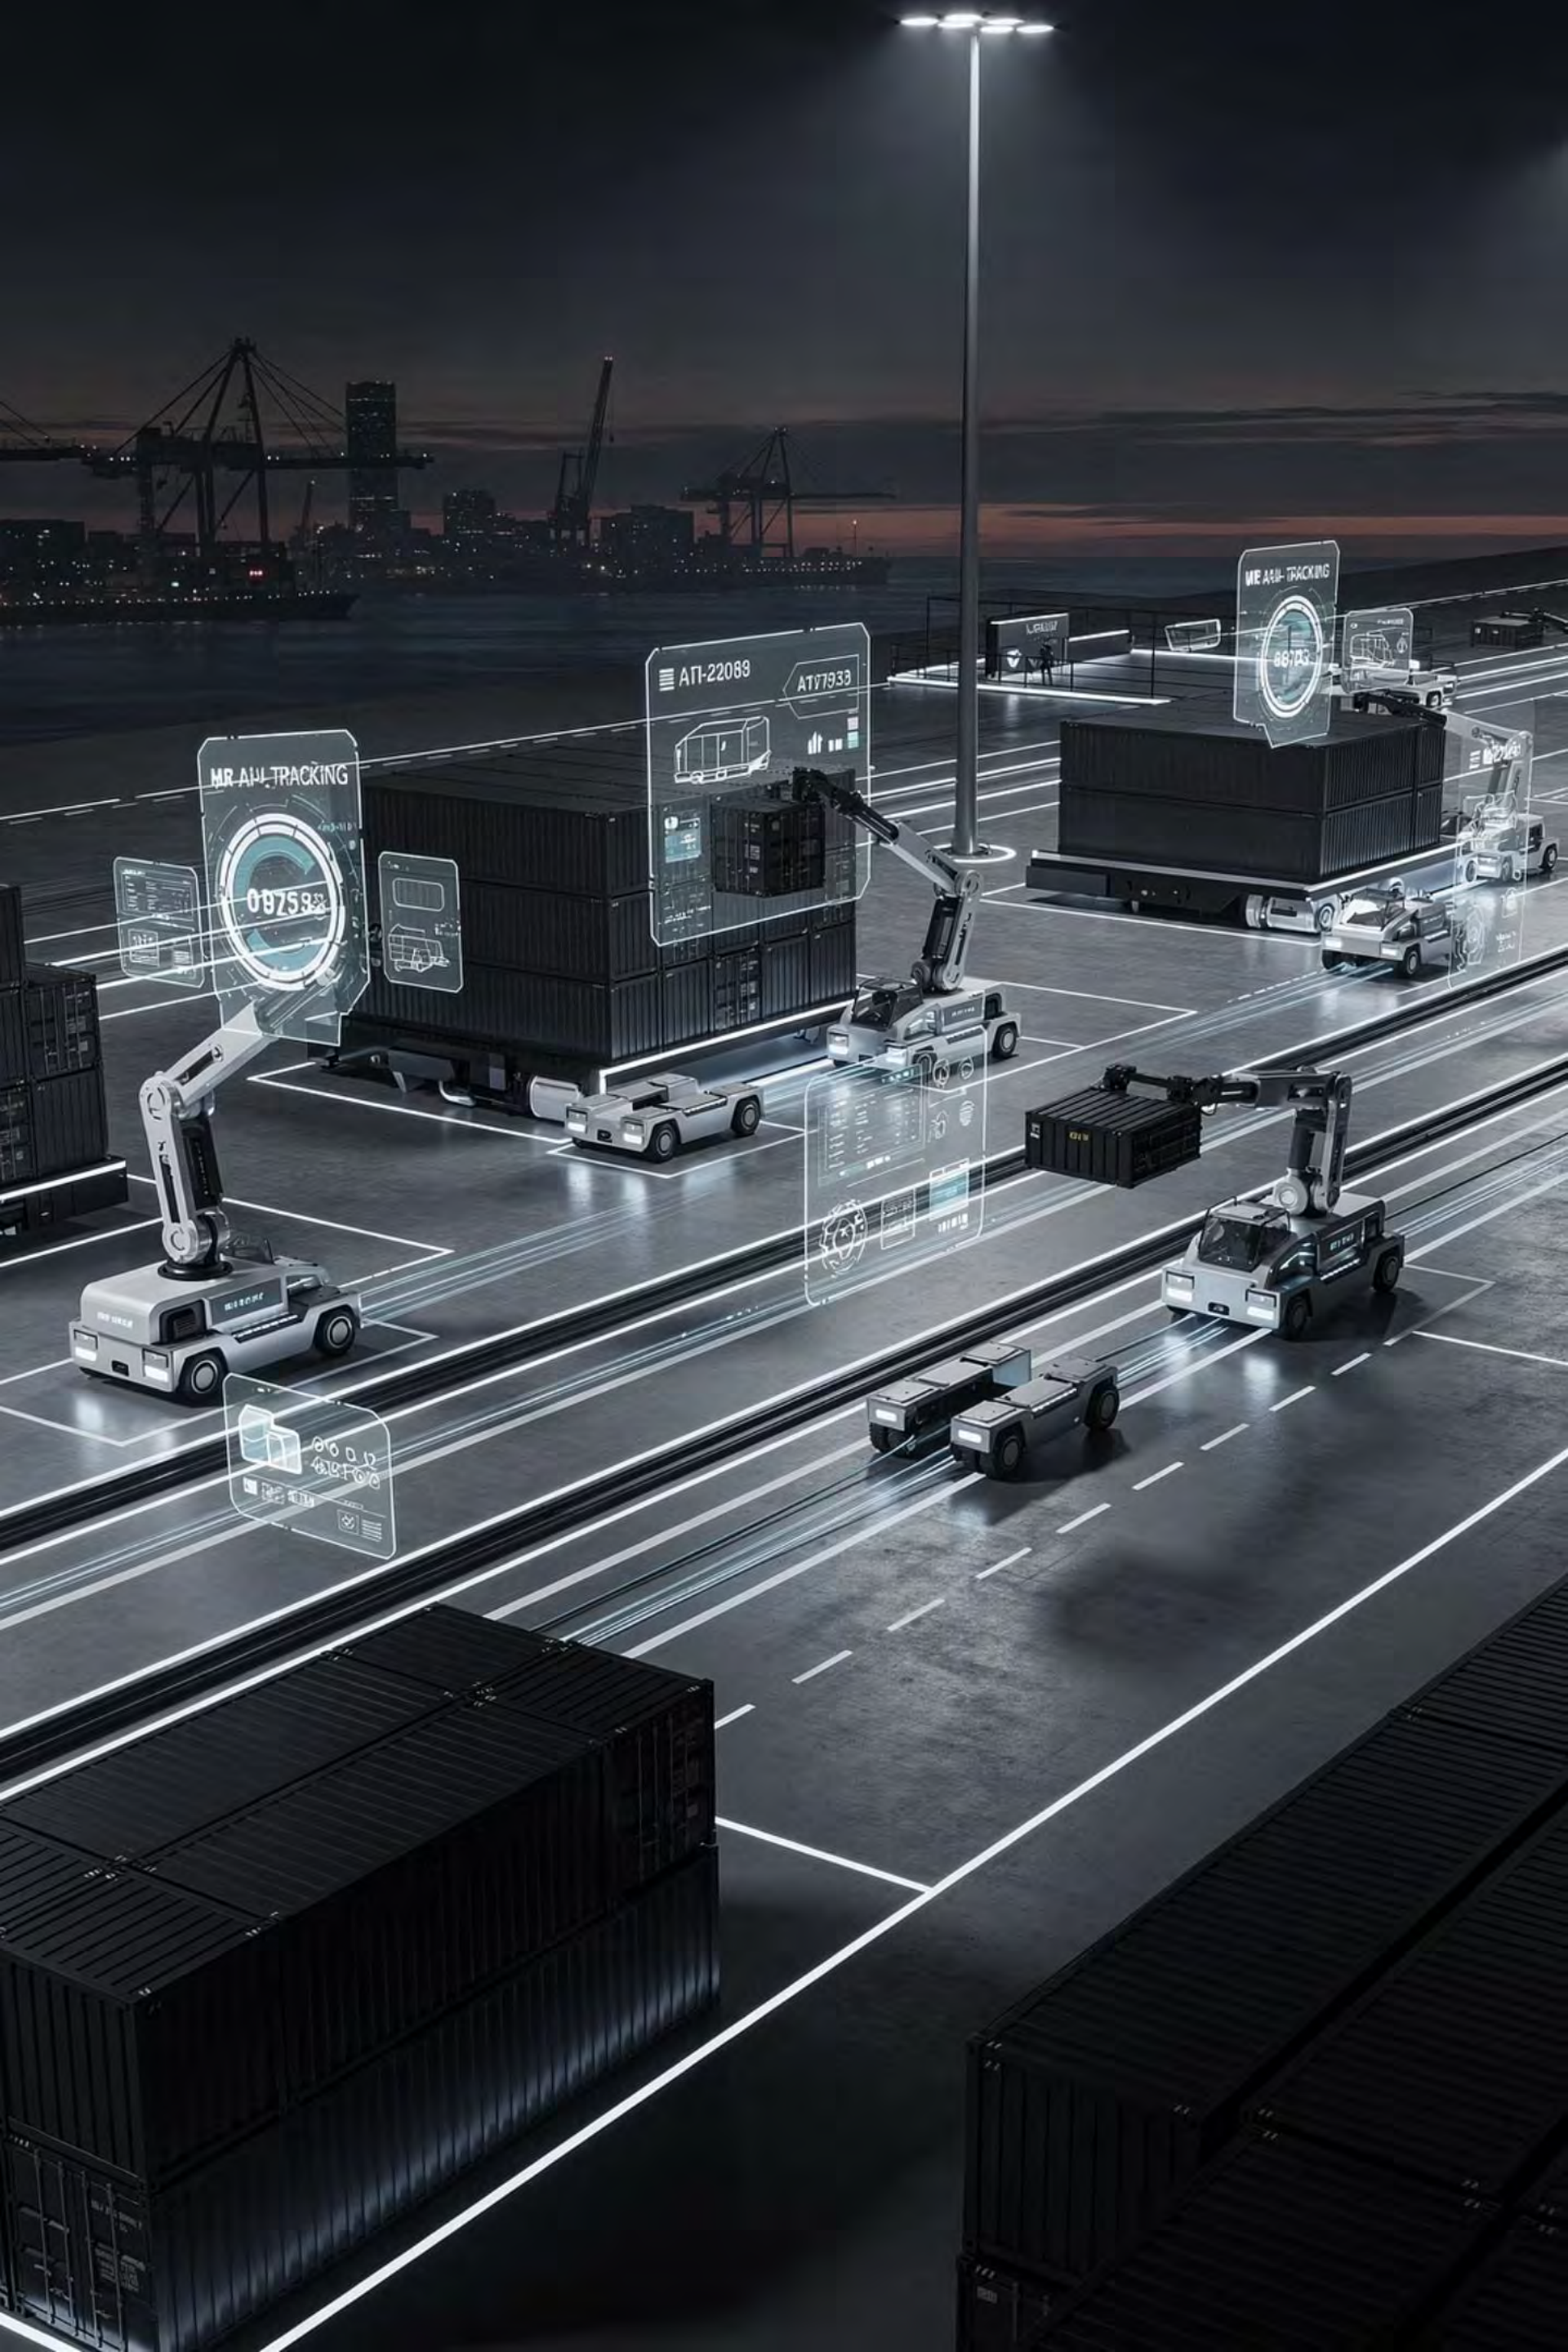

Complete container journey tracking from gate-in to vessel loading with millisecond precision

Inspection Integration

Seamless customs inspection, X-Ray scanning, and documentation processing in one unified workflow

AI Yard Optimization

Machine learning determines optimal container placement reducing unnecessary movements
