EGYPT
AT THE HEART OF
A BRIGHTER GLOBAL FUTURE

2

Shifting Trade Routes and a New Supply-Chain Philosophy

MORE ROUTES
GREATER RESILIENCE
STRONGER ECONOMIES

Global supply chains are evolving from a single-route efficiency model towards a diversified and resilient network model.

THE TRADITIONAL MODEL

A SINGLE-ROUTE APPROACH

Cost efficiency
Lower transportation costs

Shorter transit times
Faster delivery

High exposure to disruption
Dependence on limited routes

FROM MOVING CARGO
TO MANAGING TRADE AND
CREATING VALUE

THE EMERGING MODEL

A DIVERSIFIED AND RESILIENT NETWORK

Route diversification
Multiple options and alternatives

Risk distribution
Greater supply-chain resilience

Integrated logistics
Ports, storage, manufacturing and distribution

Value creation
More than just moving cargo

*A more connected,
more resilient world*

KEY TAKEAWAYS

DIVERSIFICATION IS ESSENTIAL

Alternative routes and multiple access points are increasingly important.

INTEGRATION CREATES STRENGTH

Ports are becoming connected platforms, not isolated facilities.

RESILIENCE DRIVES COMPETITIVENESS

Continuity of supply is now as important as cost and speed.

ADDED VALUE UNLOCKS OPPORTUNITIES

The future of trade depends on what corridors and ports contribute beyond cargo movement.

The future of trade will be shaped by networks that combine efficiency with resilience, flexibility, and value creation.

3

Modernising the Strategic Role of the Suez Canal

From a transit corridor to an integrated and future-ready trade ecosystem.

A STRONGER CANAL
A MORE CONNECTED REGION
A BRIGHTER TOMORROW

MARITIME CONNECTIVITY

Linking major trade routes with ports and global markets.

PORTS AND LOGISTICS

Integrated ports, logistics platforms, and maritime services supporting global trade.

INDUSTRIAL INTEGRATION

Connecting trade with manufacturing, processing, and value-added activities.

GREATER
RESILIENCE

LOWER
EMISSIONS

HIGHER
COMPETITIVENESS

MORE
VALUE CREATION

SUSTAINABLE MARITIME SERVICES

Supporting cleaner fuels, lower emissions, and a greener maritime future.

CLEANER FUELS
LOWER EMISSIONS
GREENER GROWTH

TRADE AND REDISTRIBUTION

Storage, logistics, and value-added services for regional and international markets.

REGIONAL AND GLOBAL MARKETS

A key bridge between Asia, Europe, Africa, and beyond.

Canal modernisation is not only about improving the waterway.
It is about strengthening the Canal's strategic role within an integrated and future-ready trade ecosystem.

PEOPLE
TRADE
OPPORTUNITIES
A STRONGER TOMORROW

4

Port Expansion and Mega Port Development

From cargo handling to integrated economic development.

STRONGER PORTS
BRIGHTER ECONOMIES
A MORE CONNECTED REGION

THE MODERN PORT IS AN INTEGRATED ECONOMIC PLATFORM

Connecting trade, industry, logistics, energy, and markets to create value and drive regional development.

STRATEGIC IMPACT

- Attracts investment**
Industrial, logistics, maritime, and energy projects
- Creates opportunities**
Jobs, production, and exports
- Enhances resilience**
Diversified supply chains and reliable services
- Supports sustainability**
Cleaner operations and long-term competitiveness

TURNING STRATEGIC LOCATION INTO LASTING VALUE

EAST PORT SAID

A Gateway for Trade, Industry, and Regional Connectivity

- Strategic location on global trade routes
- Integrated industrial and logistics zone
- Platform for regional markets

AIN SOKHNA

A Platform Linking Maritime Transport, Industry, Logistics, and Markets

- Direct access to major shipping routes
- Integrated logistics and industrial activities
- Supporting trade, investment, and export growth

The strategic value of mega ports is measured not only by cargo-handling capacity, but by their ability to create value, attract investment, and connect regional economies.

5

Conclusion From Strategic Location to Strategic Value

A more connected, resilient and prosperous future for global trade.

CONNECTING
PEOPLE
MARKETS
OPPORTUNITIES

A CHANGING WORLD

Geopolitical dynamics are reshaping global trade routes, making diversification and resilience essential.

NEW OPPORTUNITIES

Shifting trade patterns create real opportunities for regions that offer stable, efficient and integrated logistics platforms.

EGYPT'S UNIQUE ADVANTAGE

The Suez Canal and the Suez Canal Economic Zone connect East and West, offering world-class ports, industrial zones and logistics services.

A MORE RESILIENT FUTURE

Greater connectivity, integration and sustainability will strengthen global supply chains and create long-term value.

Egypt and the Suez Canal Economic Zone are positioned to play a pivotal role in the future of global trade —

connecting trade routes, integrating logistics and industry,
and creating sustainable value for a more prosperous
and resilient world.

STRONGER SUPPLY CHAINS

Through connectivity
and diversification

MORE INVESTMENT AND JOBS

Across logistics,
industry and services

A GREENER TOMORROW

Sustainable growth
for future generations

A MORE PROSPEROUS WORLD

Built on collaboration,
stability and shared value
