

Euromec Srl

Electrohydraulic grabs and buckets for maritime dry bulk handling

I m Alessandro Gervasio, head of sales and Co-owner Euromec .I m here to briefly introduce you the company itself

EUROMEC

Euromec, established in northern Italy 1962 is a leading manufacturer of equipment and machinery for maritime and river ports, with a focus on mineral and siderurgical segments.

Euromec year 1962

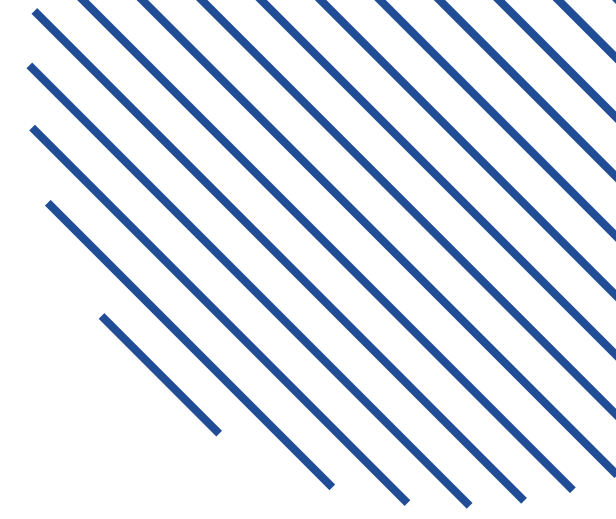

EUROMECC

Euromec, dedicated to technological innovation is making significant strides in the field of material handling.

Dry Bulk Handling

Euromec is highly committed to provide energy-efficient cutting down on operational costs:

EUROMEC

Dry Bulk Handling

Dry bulk handling plays a crucial role in global trade, involving the transportation, storage, and handling of materials.

Dry Bulk Handling

EUROMECC

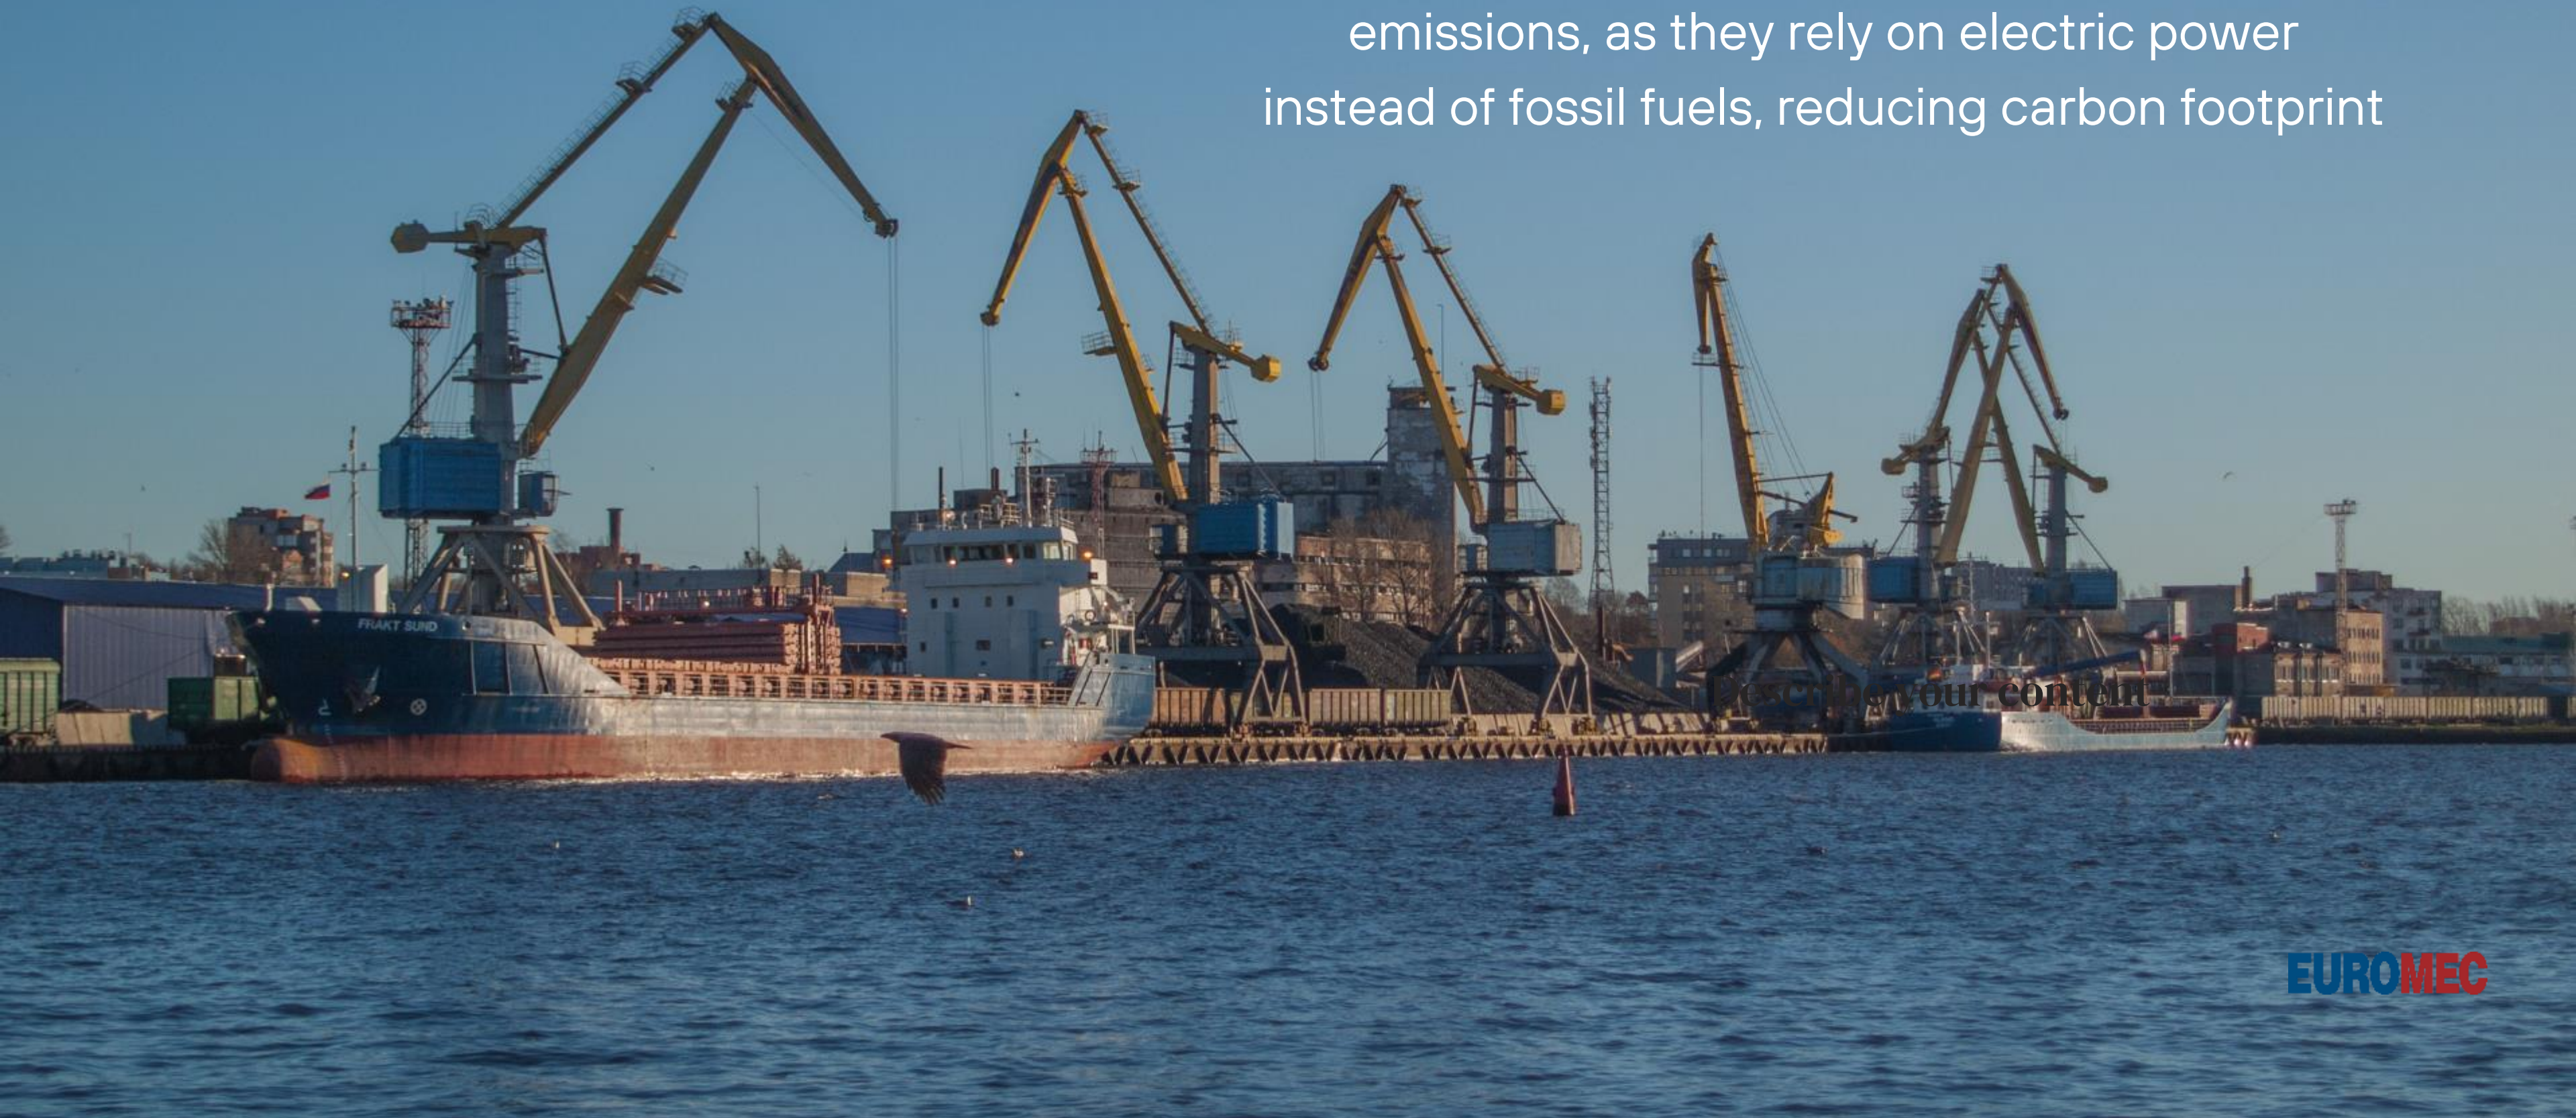

Dry Bulk: materials like coal, grain, cereals and minerals.

Sustainability

Traditional methods of handling these materials have significant environmental challenges, striving to achieve best results on pollution reduction .

Zero Emissions

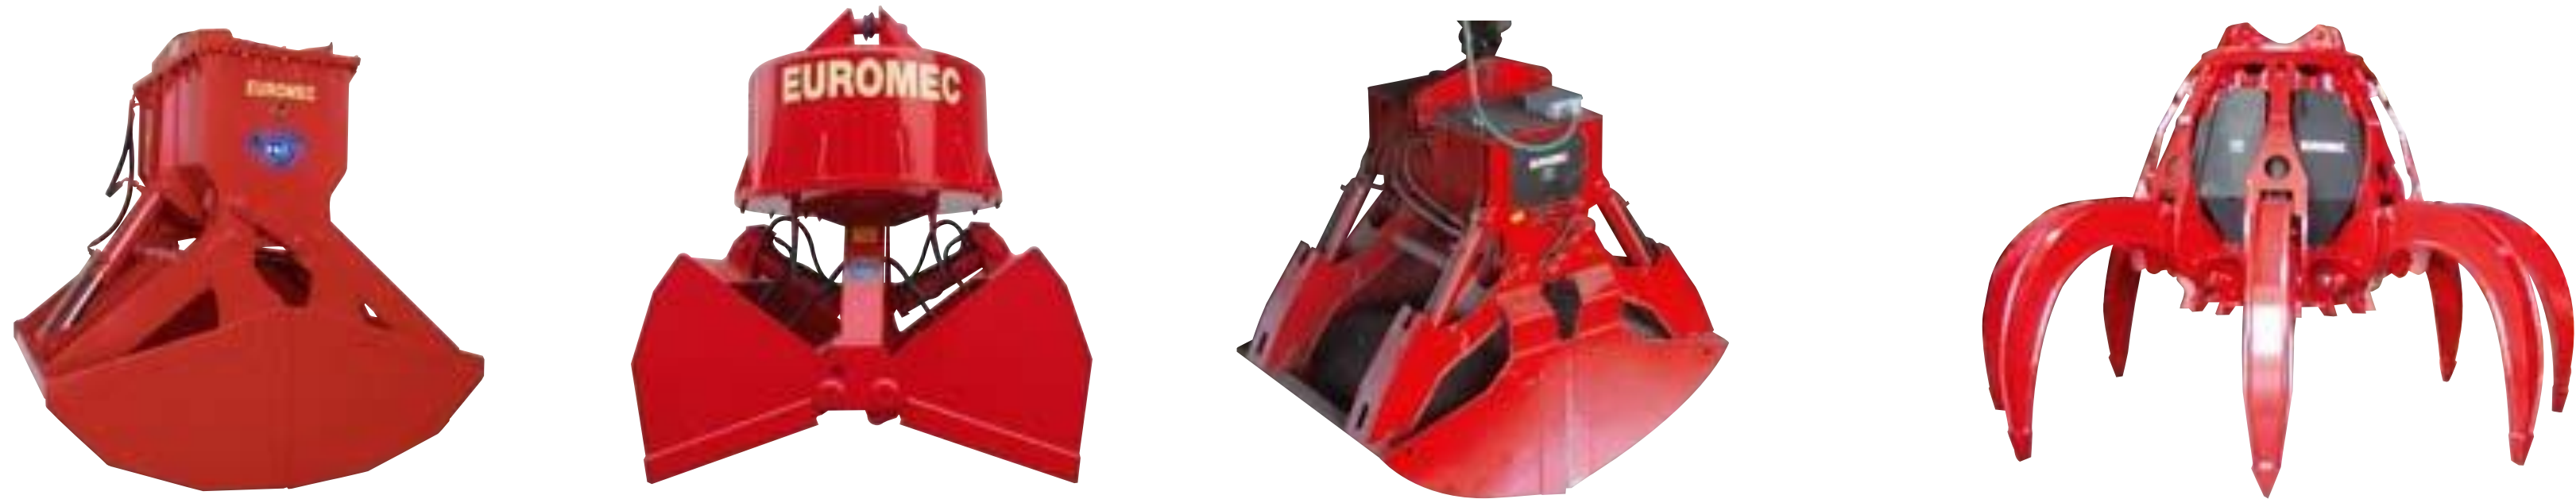

One standout feature about Euromec electro-hydraulic products is that they produce zero emissions, as they rely on electric power instead of fossil fuels, reducing carbon footprint

Describe your content

EUROMEC

Electro Hydraulic Systems

Euromec's electric systems also offer high consistency and require less maintenance compared to IC engines, resulting in smoother operations and lower long-term costs.

EUROMECC

Electro Hydraulic Systems

Electric-powered equipment ensures compliance with environmental regulations and prepares clients for a greener future.

Core Values

EUROMECC

Sustainability and decarbonization are core values at Euromec.

Manufacturing

Euromec R&D's team is continuously exploring ways to enhance product efficiency and sustainability, including renewable energy sources for manufacturing processes.

Protect the Planet

A globe of the Earth is the central focus, held gently by several hands of different skin tones. The hands are stacked, with the top hand being a darker skin tone and the bottom hands being lighter. The background is a soft, out-of-focus green, suggesting a natural, outdoor setting. The overall mood is one of care and collective responsibility.

The journey towards decarbonization and sustainability requires collaboration and a shared commitment to protecting the planet.

Shaping the Future

EUROMECC

At Euromec we are not just manufacturing equipment; we are shaping the future of the dry bulk handling industry.

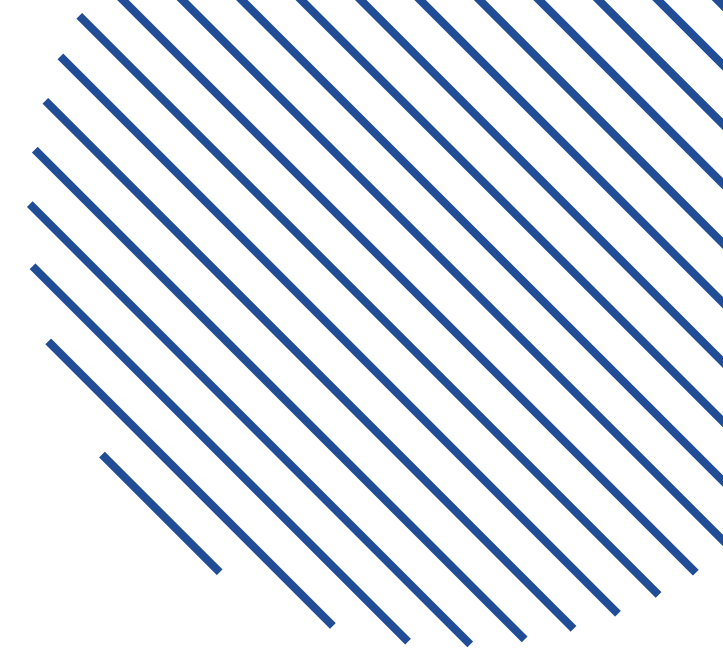

Decarbonization

Our electrohydraulic buckets and grabs are designed to meet the highest standards of performance .

Electro Hydraulic Bucket

This range of buckets is specifically conceived for dry coal handling
